Summary

Detail-oriented Data Analyst and aspiring GenAI Developer with expertise in Python, SQL, and Power BI. Experienced in building RAG-based AI systems, backend APIs using FastAPI, and performing end-to-end data analysis. Skilled in deriving actionable insights and developing scalable AI-powered applications.

Skills

Programming:	Python
Frameworks:	FastAPI, LangChain, LangGraph,
Cloud & DevOps:	AWS (Basics), Docker, GitHub Actions
Databases:	SQL
AI/ML:	RAG, Basic Machine Learning, HuggingFace Deploy
Data Tools:	Power BI, Pandas, NumPy
Tools:	Git, GitHub, Postman (API Testing), VS Code

Experience

Data Analyst Intern – Robowave Jan 2026 – Feb 2026

- Collected, cleaned, and analyzed datasets using SQL and Python.
- Built Power BI dashboards to visualize KPIs and business metrics.
- Generated insights to improve operational efficiency.

MLOps & Backend Engineer Intern – Blocksone Feb 2026 – Present

- Contributed to backend development using Python, working on APIs and real-world application workflows.
- Gained experience in product development lifecycle from initial design to deployment stages.
- Debugged API issues in large codebases, improving system stability and performance.
- Built foundational knowledge in blockchain, reinforcement learning, and collaborative development practices.

Projects

Lawyer Friend — AI Traffic Law Assistant (FastAPI, Langchain) [Link](#)

- Built a full-stack RAG-based legal assistant to answer Maharashtra traffic law queries with source citations.
- Designed hybrid retrieval pipeline (vector + BM25), Reciprocal Rank Fusion, and CrossEncoder reranking.
- Implemented a self-correcting LangGraph agent with query rephrasing and answer regeneration.
- Developed a structure-aware document ingestion system extracting legal metadata using regex.
- Integrated Redis memory, caching, and Docker-based deployment for production readiness.

Customer Behavior Data Analytics (Python, SQL, Power BI) [Link](#)

- Performed end-to-end data analysis including data cleaning, transformation, and EDA using Python.
- Designed SQL queries to analyze revenue trends, customer demographics, and discount impact.
- Built an interactive Power BI dashboard to visualize KPIs such as total revenue, customer segmentation, and purchase behavior.
- Generated actionable insights that improved understanding of customer buying patterns.

Blinkit Sales Analysis Dashboard (Power BI, Excel) [Link](#)

- Analyzed sales data to identify trends in product categories and outlet performance.
- Performed data cleaning and transformation using Power Query.
- Created DAX measures for KPIs such as Total Sales and Average Rating.
- Designed interactive dashboards for business decision-making.

Activities

Microsoft Learn Student Club (MLSC) – Design & Media Lead May 2023 – Dec 2023

- Collaborated with teams for event execution and technical content delivery.
- Designed visuals to improve communication and engagement.

Certifications

- **Microsoft PL-300: Power BI Data Analyst** – Microsoft Certified (2025)
- Prompt Engineering – Udemy
- MS-CIT Certification
- QSpiders Data Analyst (Python, SQL, Power BI)

Education

B.E. in Computer Science – GES R.H. Sapat College of Engineering, Nashik (SPPU) <i>CGPA: 6.9</i>	2025
HSC – HPT Arts and RYK Science College <i>81%</i>	2021
SSC – Madhyamik Vidyalaya, Untwadi <i>82.40%</i>	2019
